

A regional perspective on our broadband future

Dr Helen Thompson
Centre for eCommerce and Communications

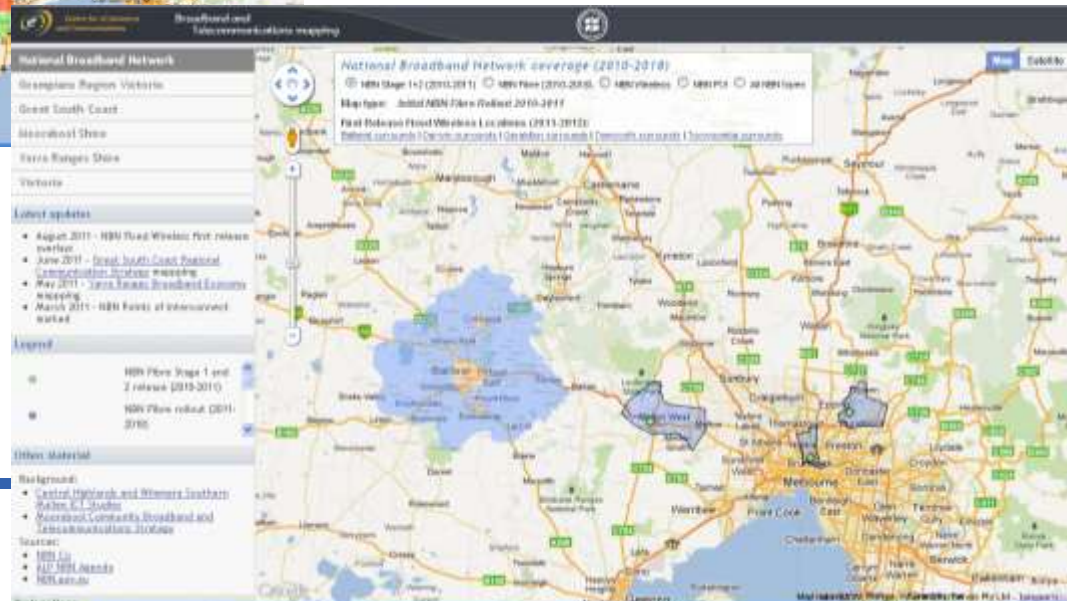

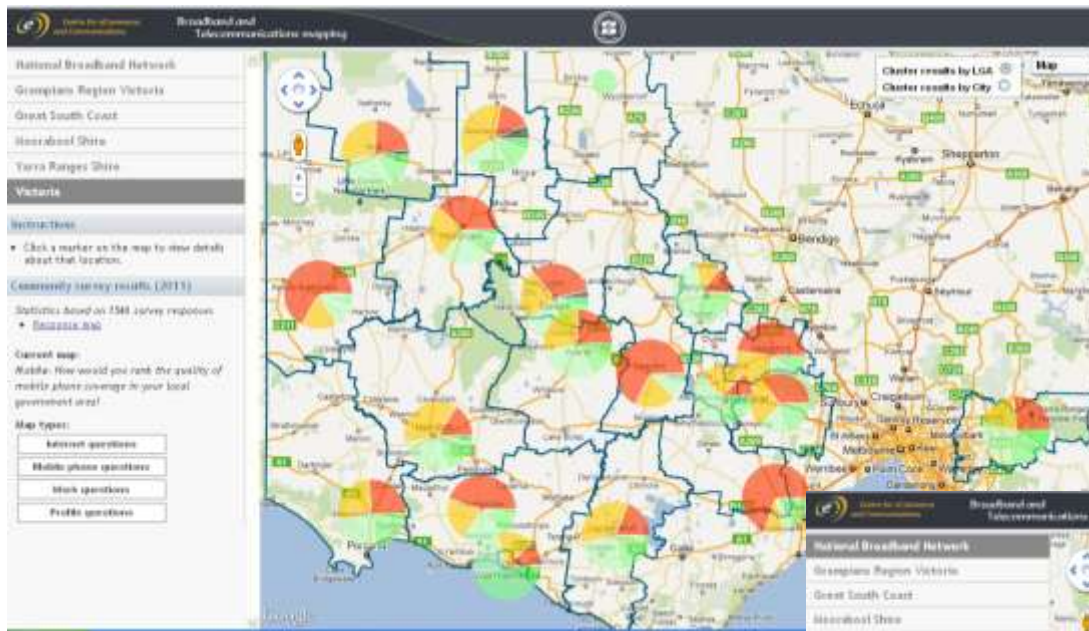

University of Ballarat
Learn to succeed

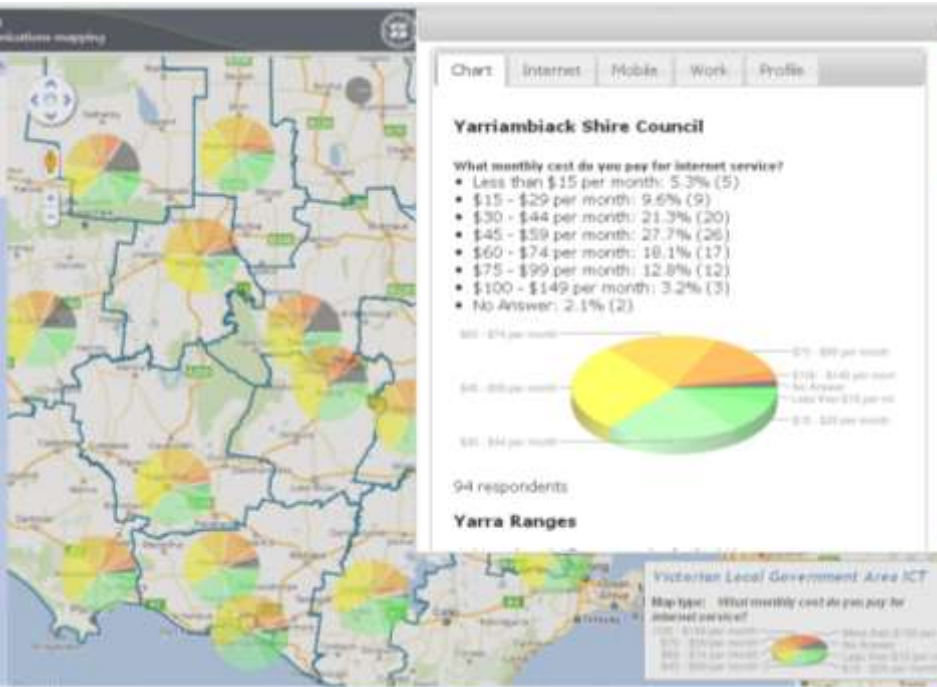

Coordinated regional and local planning

Fill some of the information and data gaps

Build a local evidence base

able access allow already also based being better broadband
 business clients communication cost could
 currently customers different easier efficient family faster files friends get greater
 have home improved information internet less mobile
 more none online opportunities other people
 research run services speed spend time up use video when
 work would

Develop regional and local responses

- Understand and communicate the inadequacies of current broadband and telecommunications services
- Advocate for change with providers and government
- Plan for effective use of next generation broadband
- Prioritise opportunities for bringing stakeholders together to activate their broadband future

Enable participation in the digital economy
